NOTE FROM TOM

• Hi All,
 There comes a time in every rover's life where they must admit that they are no longer a kid... This usually happens when they turn 26!

The crew then ceremoniously "boot" the rover from the crew (usually also presenting them with an actual boot!)

Both Greg and myself have been through scouts together since we started cubs, and now the time has come for us to get booted!

Please join us for drinks and a barbie as we groove to funky music and watch the sun set over our beautiful swan river.

5pm - 8pm at the Scout hall
31st October 2004 (yes Halloween - you can dress up if you want!)

This will also serve as a going away party for me, because I'll be jumping on a plane a few days later to go to Canada for 6 months and I'd love to catch up with everyone before I leave!

So: Bring your family! Tell your friends! You can even bring your grandmother!

We will look forward to seeing you all there!
 If you would like to have food provided, please RSVP or any questions, please contact me on 0411 241 866.

Cheers Tom :-)

Help me find our bits:

With summer fast approaching the Venturers and Rovers are planning quite a few boat maintenance activities, and I was doing an audit in our workshop... There are a number of things which I can't find and would love some help locating:

- The Drill (burgundy in a black case)
- The set of 40 Drill bits
- The circular random-orbital sander
- The Emergency stop button from the drill press (it can't run without it!)

there might be a few other things - I've been writing them up on the white-board.... We need these tools available to people doing maintenance... if we can't find them we must replace them, or maintenance will suffer. Please help me to find them!

Thanks Tom :-)
